Our Trusted Partner

In association with the Father's Day Council, The American Diabetes Association recently named Dr. Prendergast the "Father of The Year" for his remarkable scientific contributions.

Dr. Prendergast has:

- 1. Clinically tested and documented the results of more than 7,000 of his own patient base**
- 2. Admitted less than ONE percent of his patients to a hospital in 19 years**
- 3. Not lost ONE patient to Heart Attack or Stroke in 19 years**

Dr. Prendergast is Board Certified in Internal Medicine, Endocrinology, and Metabolism and has published over 50 medical articles in JAMA, The New England Journal of Medicine, and Diabetes Care.

Dr. Prendergast's greatest pursuit is to save a million lives through implementation of the BPro Vascular Pulse-Wave Screening Device and through the proven therapeutic strategies he has used for decades.

We have partnered with Dr. Prendergast in this cause and are committed to serving our patients with the greatest care available.

Strategic Health System

Cardio Pulse-Wave

The Newest Technology in Non-Invasive Vascular Screening

ABOUT THE SCREENING

The innovative BPro and CASPro Systems with "A-PULSE CASP" software instantly and accurately measures your cardiovascular health.

Measure the Difference

About the screening

The BPro Vascular Pulse-Wave Screening only takes a couple of minutes to perform, it is non-invasive, it is very simple, and completely pain free!

The BPro is placed on your wrist where the device reads and calculates a Wave Form signal that indicates the elasticity of large, small, and peripheral artery walls as well as tests stress, heart rate, and more.

You will be provided a printed copy of the results of your Vascular Screen and these results will be clearly explained to you so you understand the level of your cardiovascular health.

Once you have received this information, you will be instructed on the best therapeutic strategy you can utilize that may help you prevent/reverse the health issues you have struggled with, drug FREE.

Reliable and Accurate

The BPro Vascular Pulse-Wave Device technology offers the most advanced technology in the cardio health screening market.

This state-of-the-art equipment, technology and A-PULSE CASP software is now available to the public as a means to measure your cardiovascular health.

Take this quick, easy, and non-invasive screening that will immediately give you a baseline of your heart health.

The BPro Cardio Pulse-Wave Device is a revolutionary product that has been patented by HealthSTATS International Pte Ltd.

This technology accurately measures the Central Aortic Systolic Pressure (CASP). CASP is the blood pressure measured at the root of the aorta and the BPro is the only device approved to be used in a common clinical setting.

CASP has been shown in many recent studies as an important determinant for strokes and CVS events. It has been validated via invasive study and achieved an accuracy (co-relation) $R=0.9917$ independently.

A-PULSE CASP is FDA Certified and CE MDD approved.

The BPro Vascular Pulse-Wave Screening is 99.17% accurate and is shown to be as accurate as the catheter (invasive) method.

This is fantastic news for the general public. Finally, there is an affordable screening that can help you take control of your cardiovascular health!

Did You Know?

Vascular Disease includes any condition that affects your circulatory system. This ranges from diseases of your arteries, veins and lymph vessels to blood disorders that affect circulation. Here are some of the conditions that fall under the category of "Vascular Disease".

Peripheral Artery Disease	Aneurysm
Renal Artery Disease	Raynaud's Phenomenon
Buerger's Disease	Peripheral Venous Disease
Varicose Veins	Erectile Dysfunction
Venous Blood Clots	Many More...

Healthy arteries are flexible and elastic and blood runs through our veins as if they were lined with Teflon. As we age, this Teflon coating starts to get sticky, like Velcro, and this leads to many health risks.

The BPro measures Central Aortic Systolic Pressure (CASP), which can help your physician identify whether you have potential underlying vascular disease. When arteries stiffen, they are more likely to clog and cause heart attacks and strokes. The BPro provides critical information for you that can help you identify problems before they become life threatening.
